PROFILE

Dedicated and forward thinking Full-Stack Developer with a solid background in Industrial Mathematics and a passion for solving real-world problems through technology. Experienced in building modern, scalable web applications using tools like HTML, CSS, JavaScript (ES6+), React, React Native, Express.js, Next.js, TypeScript, Supabase and MongoDB. Known for delivering intuitive, user-focused digital products. Leveraging my academic background, I approach development with a structured and analytical mindset, consistently contributing to effective and dependable software solutions.

EXPERIENCE

August, 2024 - Present

- **NYSC Corp Member**
  Valdymas intelligence
  Stack: Nextjs, Typescript, React, Supabase, Wordpress, Discord,
  Key Responsibility:
  - Built and maintained reusable components using Next.js and TypeScript, ensuring modular and maintainable code across multiple applications.
  - Integrated state management and APIs to create responsive, data-driven interfaces aligned with user and business needs.
  - Optimized performance through SSR, lazy loading, and code-splitting, improving load times and overall user experience.
  - Assisted in maintaining and customizing the company's WordPress website by updating plugins, implementing JavaScript enhancements, and modifying template files to improve user experience and ensure security compliance.

October, 2023 - November, 2024

- **Frontend Developer**
  Eduvacity
  Stack:
  Nextjs, Typescript, React, Jira, Slack, etc
  Key Responsibility:
  - Collaborated in the development of eduvacity.com, a modern e-learning platform offering flexible course delivery, user management, and content accessibility.
  - Built responsive and accessible UI components using React and Tailwind CSS, ensuring seamless user experiences across devices.
  - Integrated backend services like Supabase for authentication, real-time data handling, and user content management

July, 2022 - August, 2023

- **Fullstack Developer**
  Zsolutions
  Stack:
  MERN (MongoDB, Express, React, Node.js), Material UI, Cloudinary
  Key Responsibility:
  - Contributed to the development of Advanced School Manager, a web and mobile platform for managing core school operations like enrollment, attendance, grading, and reporting.
  - Developed scalable APIs and integrated Cloudinary for efficient media management across student, guardian, and staff records.
  - Designed responsive and intuitive user interfaces with React and Material UI, improving accessibility and usability for both administrators and students.
